Healthcare Career Program Guide

Long Beach City College
Start Here. Finish Anywhere.

Long Beach City College

"Start Here, Finish Anywhere"

Welcome to Long Beach City College !

*Health care is one of the four fastest growing industries in our region, with a projected need for over 150,000 new employees by the year 2006. And, while previous healthcare shortages were about the **number** of employees, the current shortage also reflects a dramatic increase in demand for the **type** of skilled professionals needed to meet the requirements of increasingly complex and technical medical providers.*

Long Beach City College offers quality health care education and training programs, experience with diverse students, a range of support services designed to increase success rates, and a curriculum that focuses on the integration of basic academic skills and technology. We welcome your interest in our programs and offer this information in this brochure as a first step in your educational process.

For more information, please call the School of Health Science to schedule an appointment. We look forward to working with you !
